

# Using MATLAB Through Software Remote:

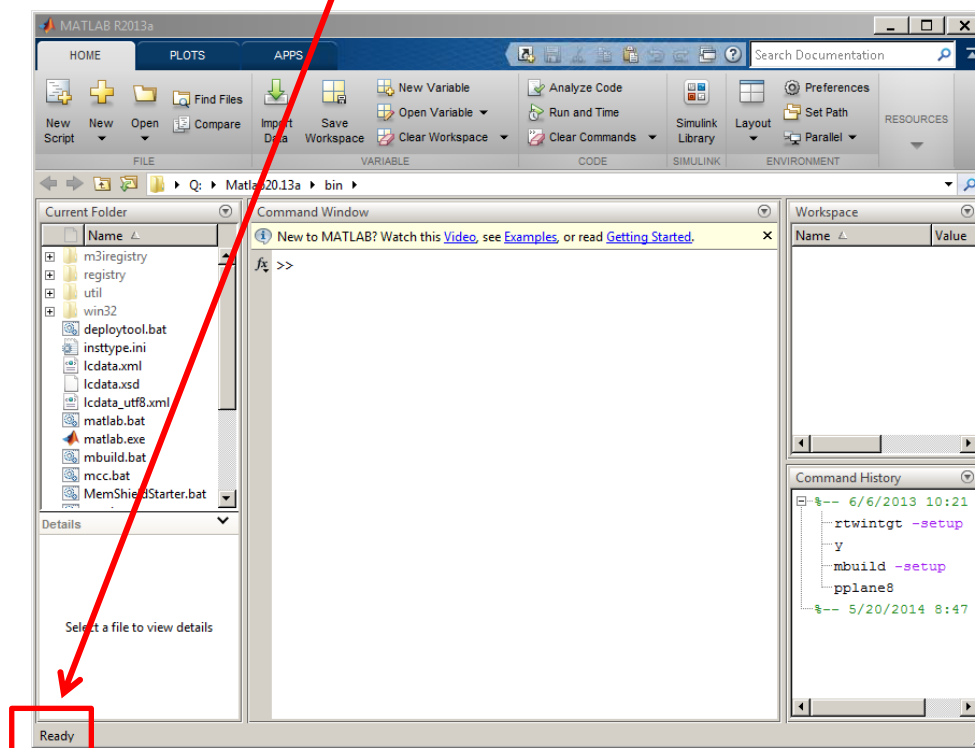

## *How to access your Purdue Career Account Drive*

### Step 1: Log in to Software Remote and Start MATLAB

Updated Instructions for steps 1 to 3: To run Citrix from your desktop use this link:

<http://goreremote.itap.purdue.edu>

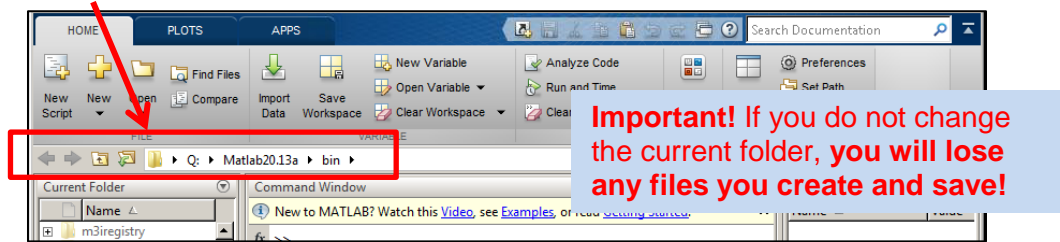

4. Click the MATLAB icon to start MATLAB.
  - If a file called **launch.ica** downloads to your computer, double click it to start MATLAB.
5. Wait for MATLAB to initialize.
  - Once MATLAB is ready, you will see the Command Window shown below and the word **Ready** in the lower left.

**Important!** Do not begin using MATLAB until you see **Ready** in the lower left.

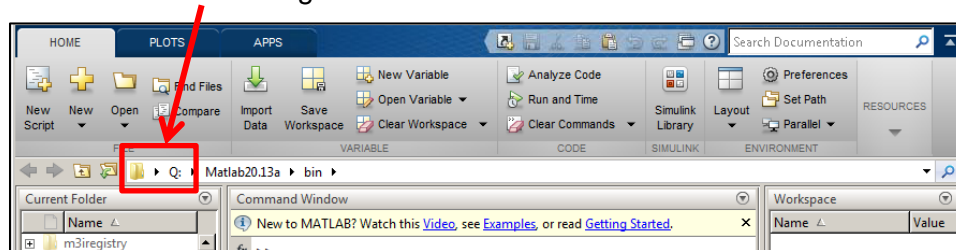

## Step 2: Change the current folder to your Purdue Career Account Drive

In the MATLAB Command Window, the default current folder is listed in the current folder toolbar. You must change the current folder to your Purdue Career Account Drive.

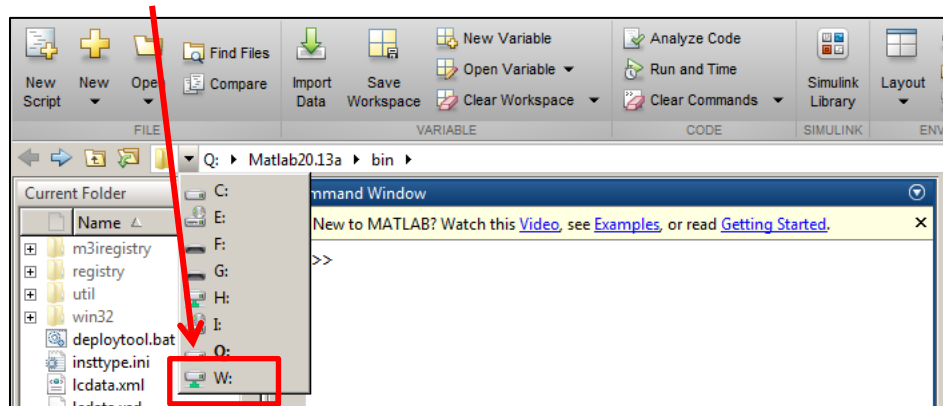

To change the current folder:

1. Click the leftmost triangle in the current folder toolbar.

2. Select the **W:** drive, which is your Purdue Career Account Drive.

The current folder toolbar will now show the W: drive. You will also see the contents of your W: drive (Purdue Career Account Drive) and can navigate to any location within it.

To create a new folder within your Purdue Career Account Drive, right click within the current folder and select **New Folder**.

Contents of your  
**W: drive**
